How to donate, support, and volunteer

The Humane Society of Greater Kansas City accepts donations by mail at 5445 Parallel Parkway, KCKS 66104; online at www.hsgkc.org, or by phone at 913-596-1000 ext. 115. We accept corporate matching gifts, and would be happy to assist donors who are interested in planned gifts or gifts of stocks and bonds. We often need in-kind donations. A complete list of needed items is available on our website at www.hsgkc.org.

We are always looking for people who love animals and are interested in getting involved in the community. Volunteers are integral to our programs, helping us make sure that every animal receives the highest quality of care, attention, and compassion. The first step to volunteering is completing the volunteer profile on our website, then calling our office for more information.

Mission & Areas Served

Statements

Mission Statement

This mission of the Humane Society of Greater Kansas City is to save and improve the lives of dogs and cats throughout the greater Kansas City community by providing education, adoptions, preventive veterinary care and spay/neuter services.

Background Statement

Founded in 1912, the Humane Society of Greater Kansas City (HSGKC) is Kansas City's oldest shelter, and the first to establish a "no kill" policy. Originally called The Humane Society of Wyandotte County, HSGKC was founded by two sisters, Sarah Jacobs and Henriette H. Jacobs. HSGKC serves the community through a subsidized preventive veterinary care clinic for low-income pet owners, animal adoptions, spay/neuter services, and a humane education/outreach program.

Impact Statement

Last year, the Humane Society of Greater Kansas City had more than 22,000 client visits. In the past three years, our Clinic revenue has increased from \$800,000 to \$1,080,000. This is a result of expanded hours and the addition of staff to meet the growing need for affordable veterinary services in the metropolitan area, particularly in Wyandotte County. Our veterinary staff has grown to include one Medical Director, one full-time veterinarian, and four part-time veterinarians. We are offering surgeries six days each week. We've also secured donated medical equipment (x-ray machine, dental machine, and sonogram machine) to better serve our target populations.

Goals for the coming year include improved marketing strategies, streamlining front and back office operations, and expanding our resource development efforts.

Needs Statement

Humane Society of Greater Kansas City has identified the following current needs:

1. Operational funds to meet the growing demand for services.
2. A new van to transport animals to adoption events.
3. A commercial lawnmower and two weed-eaters to service our 10 acre property. A volunteer has offered to mow our property for free, which would save us \$1,100 per month, but we need the equipment.

CEO/Executive Director/Board Chair Statement

Serving as Executive Director of Humane Society of Greater Kansas City is an honor and privilege. We serve animals and their owners well, among significant competition. Our challenge is to communicate the distinctiveness of HSGKC so the entire Kansas City community is aware of our services. Different from other animal rescue and shelter agencies, HSGKC is an animal clinic first and foremost. More clearly, we are a low-cost animal clinic; well-positioned to serve both low-income neighborhoods in Kansas City, Kansas, as well as the greater metro area. In addition to Clinic services, we also offer Shelter and adoption services, with a commitment to house dogs and cats as long as needed before they find their forever homes.

We provide the same adoption procedure for every pet with careful thought to finding forever homes for each one. Our mission is focused on the health and welfare of animals, a message we are charged with communicating clearly in the coming months.

Animal Shelter and Adoptions

Description	<p>Animal control and community residents bring stray and unwanted dogs and cats to HSGKC on a daily basis. Upon arrival, animals are examined by one of our staff veterinarians and treated for any medical problems they may have. Through donations to our Gabriel's Fund, we are able to save seriously sick and injured dogs and cats that otherwise would not have a chance.</p> <p>Our dogs have indoor/outdoor dog kennels with big play yards. Volunteers assist HSGKC on a daily basis by walking dogs and interacting with animals. Most of our cats are free to lounge and play in rooms filled with cat furniture and toys, rather than confined to cages.</p> <p>We find homes for 97% of the pets in our care, and we have no time limits for how long a pet may stay. We are a no-kill facility.</p>
Category	Animal-Related, General/Other Animal Protection & Welfare
Population Served	General/Unspecified, ,
Short-Term Success	1.Short-term success for the Animal Shelter and Adoptions program includes finding homes for senior animals with senior adults, continuing to provide free shelter for animals in need, reducing the number of animals picked up and/or euthanized each year in Animal Control, reducing the number of abandoned animals, and providing more free adoptions to veterans.
Long- Term Success	Long-term goals include the following: <ul style="list-style-type: none">· Continue to improve results in all ongoing programs· Enhance and expand the Ray of Hope program· Increase facility space to save more animals
Program Success Monitored By	We monitor progress in the no-kill shelter by counting the number of animals placed in adoptive homes, number of animals returned, number of animals placed in foster/rescue group homes and number of animal offense citations in Wyandotte County.
Examples of Program Success	HSGKC facilitated the adoption of 571 animals from our shelter in 2016. HSGKC has the lowest animal return rate in the area at less than 5 percent.

Low-Cost Veterinary Care Clinic

Description	<p>HSGKC provides low-cost spay and neuter services and preventive veterinary care services for the public. Our clinic helps people on a limited budget care for the veterinary needs of their pets, and saves lives by reducing pet overpopulation through spay and neuter surgeries. We provide nearly \$60,000 in uncompensated care to animals each year.</p> <p>Through individual client meetings, our vet staff also works with pet owners to educate them about proper and responsible pet care. Through these efforts, the Humane Society of Greater Kansas City is able to significantly improve and save the lives of thousands of pets in the Greater KC community.</p> <p>An estimated 12,000 animals are euthanized each year in the greater Kansas City area, but spay and neuter services provided by the Humane Society help control the pet population, lowering the number of animals at risk of being euthanized. We estimate that 70% of our clients would not be able to spay or neuter their pets without our service.</p>
Category	Animal-Related, General/Other Animal Control
Population Served	General/Unspecified, ,
Short-Term Success	<p>The number of low-income clients participating in free clinics will increase by 25%.</p> <p>The percentage of low-income clients who report their physical or mental health is improved by pet ownership and the availability of HSGKC's services will increase by 50%.</p> <p>The percentage of our clients who are able to keep their pets due to our free services will increase by 25%.</p> <p>The number of animals kept from entering shelter as a result of free care and education will increase by 10%.</p>
Long- Term Success	<p>Long-term goals include:</p> <ul style="list-style-type: none">· Continue to improve results in all ongoing programs· Enhance and expand the Ray of Hope program· Increase facility space to save more animals
Program Success Monitored By	Outcomes are measured through appointment records, applications for free clinic services, surveys,
Examples of Program Success	100% of all cats and dogs who come to our shelter are spayed or neutered. In 2016, HSGKC completed spay/neuter surgeries on 5,757 animals in our clinic.

Humane Education Program

Description	<p>We believe education is the key to ending cruelty toward animals, creating a more compassionate community toward animals, finding homes for homeless pets, and eliminating stray dogs and cats. Targeted to school-aged children, the Humane Education program teaches compassion toward animals, responsible pet care (including spaying and neutering), and safety around pets. Presenters accompanied by a pet are scheduled for schools, churches, or other community organizations. We also offer presentations and tours at our facility at 5445 Parallel Parkway, Kansas City, KS. This program reaches nearly 4,000 students annually.</p> <p>We believe our Humane Education program, offered free to the public, is a key achievement and a critical component of the Humane Society mission. We cannot adopt our way out of the problem of homeless pets. Ultimately, the problem will only be solved through education about responsible pet care and the importance of compassion toward all of our companion animals.</p>
Category	Animal-Related, General/Other Animal Ownership
Population Served	Children Only (5 - 14 years), ,
Short-Term Success	<p>The number of low-income clients participating in free clinics will increase by 25%.</p> <p>The percentage of low-income clients assisted by Humane Society who report their physical or mental health is improved by pet ownership and the availability of Humane Society services will increase by 50%.</p> <p>The percentage of our clients who are able to keep their pets due to our free services will increase by 25%.</p> <p>Free collars and leashes given out through Walk Your Dog will increase by 25%.</p>
Long- Term Success	<p>Long-term goals include:</p> <ul style="list-style-type: none">· Continue to improve results in all ongoing programs· Enhance and expand the Ray of Hope program· Increase facility space to save more animals
Program Success Monitored By	HSGKC monitors the number of animal-related injuries treated at Children's Mercy Hospital and the number of animal offenses cited in Wyandotte County. We also monitor the number of spay/neuter coupons redeemed (passed out during the education classes).
Examples of Program Success	So often when the educator meets with a group of children they demonstrate very dangerous behaviors toward the educator's companion dog. Through the education classes, children learn first-hand how to approach the educator's dog. It's very exciting to watch the children approach the dog correctly and have the dog react with a wagging tail.

Ray of Hope

Description	<p>Since 2009, Humane Society has partnered with Kansas City, Kansas Animal Control to help save the city shelter's pets. Since its inception, Ray of Hope has saved the lives of thousands of animals. Through Ray of Hope, dogs and cats at KCK Animal Control shelter are spayed or neutered, and they receive medical examinations, vaccinations, medications, and other medical procedures.</p> <p>HSGKC volunteers conduct weekend satellite adoption events to help find homes for the KCK Animal Control shelter pets. In addition, HSGKC transfers many animals from the KCK shelter to our facility - pets in need of special medical treatment, who have other special needs, or are too young to be adopted. We are the veterinary clinic of license with Animal Control. Several of these dogs and cats would have been needlessly euthanized at the city shelter due to space and budgetary constraints.</p> <p>Since this partnership has started, euthanasia rates have dropped from 80% to less than 5%.</p>
Category	Animal-Related, General/Other Animal Protection & Welfare
Population Served	Adults, ,
Short-Term Success	Ray of Hope success is measured by saving animals' lives, engaging volunteers, connection animals to permanent homes, and reducing the euthanasia rate in Kansas City, Kansas.
Long- Term Success	Long-term goals include: <ul style="list-style-type: none">· Continue to improve results in all ongoing programs· Enhance and expand the Ray of Hope program· Increase facility space to save more animals
Program Success Monitored By	Animal intake numbers are tracked monthly. When we notice certain neighborhoods that have a high rate of roaming animals or animal bites, our staff go into the neighborhood for education purposes.
Examples of Program Success	Through our Ray of Hope partnership with KCK Animal Control, we adopted/transferred 2,659 dogs and cats in 2016. The euthanasia rate at KCK Animal Control has decreased from 80% to 4% since the Ray of Hope partnership started.

Behavior Enrichment Group (BEG)

Description	<p>BEG focuses on the rehabilitation of dogs who come to HSGKC as a result of abandonment, injury, or neglect. After our agency has attended to their immediate health and wellness needs, each dog is entered into the BEG program, which supplements the physical well-being of Shelter dogs by focusing on their physical and mental stimulation, thereby enhancing their daily experience and presenting a healthier dog to their forever family.</p> <p>Every dog coming into HSGKC is assessed by the Director of Behavior Enrichment and kennel staff. A specific BEG program is created for each dog. Evaluations take place one week after intake, once the dog is acclimated to the shelter.</p> <p>Staff and volunteers dedicate their time to one dog at a time to work on obedience, agility, and socialization. Progress is documented in the adoption dossier. Dogs are prioritized in order of need for behavior enhancement to increase likelihood of adoption.</p>
Category	Animal-Related, General/Other Animal Training
Population Served	General/Unspecified, ,
Short-Term Success	Behavior Enrichment Group success is measured through a reduction in return rates among adopted pets, engaged volunteers, and improved behavior among dogs in the shelter.
Long- Term Success	Long-term goals include: <ul style="list-style-type: none">· Continue to improve results in all ongoing programs· Enhance and expand the Ray of Hope program· Increase facility space to save more animals
Program Success Monitored By	Every dog in the program is assessed weekly by staff. All BEG information is entered into each dog's file, including the animal's needs, wants, behavior, favorite toys, comfortable and uncomfortable social situations, photos, and a log of daily enrichment activities completed by each dog.
Examples of Program Success	The BEG program is new and will be fully assessed this year.

CEO Comments

Our biggest challenge is the ongoing cost to care for and treat animals in our charge. Adoption fees only offset a fraction of the cost for food, bedding, litter, medications, etc., not to mention the ongoing operational costs of our 10,000 square foot facility. HSGKC is literally the last chance for many animals, some requiring extraordinary medical and rehabilitative care, who would face almost certain euthanization were it not for HSGKC. Through our programs, they find loving homes for whom they are an unmitigated blessing ... changing and improving lives.

Leadership & Staff

Executive Director/CEO

Executive Director	Ms. Kate Fields
Term Start	Feb 2015
Email	kate@hsgkc.org

Experience

Kate Fields has a Bachelor's Degree from the University of Kansas in Communications, and a Master's Degree in Business Management from Baker University. She has significant experience in for-profit business management, moving into the non-profit world in 2006 as Director of Marketing and Communications for the American Truck Historical Society.

Kate spent six years with Heartland Habitat for Humanity, first as Volunteer Coordinator, and then Director of Development. In 2013, Kate joined the Humane Society of Greater KC to become the Director of Humane Services. In 2015, she was promoted to President/CEO.
